SUSTAINED RELEASE CAPSULES

Sustained-release (SR) capsules are developed to release the active substance gradually over a long period of time. SR capsules are an innovative form favors a better absorption of active ingredients and better tolerability in daily diet.

Sustained-release (SR) capsules designed to release the drug substance gradually over a long period of time.

Micro-pellets are special granules about 1 mm diameter, which are dosed in hard capsules. Active substances are coated with a **porous membrane** that covers the core.

SR-technology provides these active substances with **strong acid protection** (more than two hours in gastric acid). SR-technology **allows avoiding the irritation effect** for the stomach and reducing risk of side effects. Therefore taking SR-capsules provides a **high safety level for digestive tract**.
